AIR-GAPPED SOVEREIGN COMPUTING FOR CYBER SECURITY & DEVSECOPS TEAMS

Permanent Sector Sanitization • Zero Network Leaks • Line-Rate Cryptographic Attestation

ZERO SAAS RENT

THE 3 CRITICAL SECURITY TRAPS FOR IT & ENGINEERING TEAMS

Forensic Data Recovery
Standard OS file deletion leaves disk sectors intact; decommissioned laptops and servers sold or recycled in Patna expose client databases and credentials to low-cost forensic recovery.

Clipboard Telemetry Leaks
Cloud-based clipboard managers sync copied text across web servers, silently leaking database connection strings, JWT authorization tokens, and private SSH keys to foreign data centers.

Unverified Deployment Drifts
Deploying server binaries and configuration updates without multi-threaded SHA-256 verification and side-by-side visual inspection leads to silent production downtime and security drifts.

The RQL Sovereign Solution: 100% Air-Gapped Workstation Execution

Every commercial DevSecOps suite from Rehan Quant Lab is engineered in 100% pure native Rust with compile-time memory safety. Standalone Win32 PE32+ executables operate entirely within physical workstation RAM without touching external cloud servers. Zero Electron bloat, zero Python runtime interpreters, zero background telemetry, and air-gapped cryptographic hardware licensing (`license.rql`). Formally analyzed and certified clean by Microsoft Defender Security Intelligence.

`DoD 5220.22-M Multi-Pass Shredding` `4.8 GB/s Hardware SIMD Hashing` `Air-Gapped AES-256 Clipboard Vault` `Synchronized Myers Vector Diff` `Statutory DPDP Act Audit Logs`

Zero Cloud Risk
Zero external network calls. Passwords, hashes, and sensitive client binaries never touch internet sockets.

Perpetual Ownership
Pay once, own forever. Zero monthly SaaS subscription fees, zero forced vendor price hikes.

Hardware SIMD Speed
4.8 GB/s line-rate hashing, DoD multi-pass drive wiping, and instant Myers vector diffs.

14-Day Guarantee
100% risk-free. If it fails to boot instantly or eliminate SaaS expenses, full unconditional refund.

BNI PATNA 1-TO-1 REFERRAL TRIGGER

Ask IT companies, software houses & sysadmins in Patna: *"When you wipe client servers or sell old office laptops, are you sure data can't be forensically recovered? And are your engineers leaking sensitive API tokens via cloud clipboard tools?"* If yes, introduce them to Founder Mohammad Rehan (+91 70915 18548) for an immediate on-site demonstration in Patna!

EXECUTIVE QUESTIONS & ANSWERS (Q&A FOR IT TEAMS)

Q: Can data shredded by FileShredder be recovered?
No. With 7 passes of DoD 5220.22-M alternating bit patterns and hardware FlushFileBuffers, recovery is physically and magnetically impossible.

Q: Is this a subscription or perpetual ownership?
100% Perpetual Lifetime Ownership. Pay once, own forever. Zero recurring monthly SaaS fees, with full B2B GST tax invoicing.

Q: Does ClipVault ever send clipboard text online?
Never. The binary has zero networking code linked into its binary. Clipboard entries stay 100% in a local AES-256 encrypted database.

Q: What if a tool does not meet our infrastructure workflow?
14-Day Sovereign Guarantee: If any tool fails to boot instantly or eliminate recurring SaaS costs, Founder Mohammad Rehan issues an immediate 100% refund.

Direct Engineering Fleet Onboarding & Patna Setup: Standalone Win32 PE32+ binaries with cryptographic hardware attestation (`license.rql`).
