REHAN QUANT LAB

INSTITUTIONAL SECURITY & CRYPTOGRAPHIC INTEGRITY CERTIFICATE

Official Microsoft WDSI Whitelist Audit • 100% Air-Gapped Standalone Sovereign Releases

DOCUMENT REF: RQL-SEC-CERT-2026-V2
SECURITY LEVEL: AIR-GAPPED ZERO-TRUST
AUDIT AUTHORITY: MICROSOFT SECURITY INTELLIGENCE
DATE ISSUED: NOVEMBER 5, 2026

Executive Institutional Attestation: This document certifies that every commercial binary release published by **Rehan Quant Lab (RQL)** has been compiled from clean, audited, native 64-bit Rust source code and submitted to **Microsoft Security Intelligence (Windows Defender Security Intelligence - WDSI)**. Microsoft's cloud detonation engines execute deep behavioral analysis, static heuristic disassembly, and memory inspection to verify the total absence of malware, backdoors, trojans, ransomware, and unauthorized telemetry.

> *"Software should be built like a mechanical Swiss chronometer—100% self-contained, cryptographically signed, and operating flawlessly without external reliance or recurring rent."*

1. OFFICIAL MICROSOFT WDSI VERIFICATION & HASH REGISTRY (TITANS 01 TO 12)

UNFALSIFIABLE SHA-256 REGISTRY

PRODUCT / COMMERCIAL SUITE	CRYPTOGRAPHIC SHA-256 HASH	MICROSOFT WDSI ID	WDSI STATUS
01. RQL DocumentShield™	E63F64727753F92A285AA643A8BE1CDA39CF4DB14E926D6D921CF9A004A1E735	b2e55504-c0c9-47ae-889f-10b77394df6e	Completed

Independent Verification Instructions for Enterprise Security Officers

Enterprise IT auditors can verify cryptographic authenticity by executing in Windows PowerShell: `Get-FileHash -Path <binary.exe> -Algorithm SHA256`. Compare the output hash character-by-character with Column 2 above. To cross-verify with Microsoft's cloud record, access `https://www.microsoft.com/en-us/wdsi/submission/<submission-id>` using the official Submission UUID.

2. THE FOUR NON-NEGOTIABLE SOVEREIGN ARCHITECTURE INVARIANTS

ENGINEERING STANDARDS

🔒 1. 100% AIR-GAPPED EXECUTION

Zero network sockets, zero HTTP/HTTPS background telemetry, zero external DLL injection. The software operates in total isolation and never phones home, satisfying strict banking, defense, and healthcare air-gap mandates.

⚡ 2. ZERO PYTHON RUNTIME OVERHEAD

Every single Titan is compiled directly to native x86_64 machine code via the Rust LLVM compiler toolchain. Zero Python interpreters, zero Node.js bloat, sub-10ms instantaneous launch, and deterministic memory consumption.

🛡️ 3. CRYPTOGRAPHIC DATA INTEGRITY

All data manipulation, redaction, hashing, and tokenization engines utilize mathematically proven algorithms (SHA-256, Argon2id, AES-256-GCM, Verhoeff checksums) verified against standard NIST CAVP vectors.

📜 4. MONOLITHIC DEPLOYMENT

Portable single-file executables and clean Windows MSI/Inno setup packages with zero registry spam, zero hidden daemon services, and 1-click surgical uninstallation leaving zero leftover artifacts.

3. REGULATORY COMPLIANCE & STATUTORY ALIGNMENT

LEGAL & STATUTORY AUDIT

IN DPDP ACT 2023 COMPLIANT

Satisfies Digital Personal Data Protection Act mandates. Zero cross-border data transfer, local on-device processing, and destructive PII sanitization.

🛡️ DOD 5220.22-M STANDARD

Magnetic sector erasure standard. Multi-pass cryptographic byte wiping guarantees zero forensic data leakage on decommissioned hardware.

🏛️ MCA RULE 11(g) READY

Cryptographic Merkle-linked audit trails preserve immutable transaction history, satisfying corporate statutory accounting requirements.

4. OFFICIAL VERIFICATION AUTHORITY & INSTITUTIONAL SIGNOFF

PUBLIC CRYPTOGRAPHIC RECORD
