AIR-GAPPED SOVEREIGN COMPUTING FOR ADVOCATES & LEGAL CHAMBERS

BAR COUNCIL & DPDP COMPLIANT

Absolute Attorney-Client Privilege • Court-Admissible Bates Stamping • True Binary Redaction

THE 3 CRITICAL CLOUD TRAPS FOR ADVOCATES & LAW CHAMBERS

Breaches of Privilege & DPDP 2023

Uploading confidential FIRs, client affidavits, and commercial contracts to free online PDF converters destroys statutory attorney-client privilege and risks ₹250 Cr DPDP penalties.

Fake "Highlighter" Blackouts

Drawing black rectangular shapes over sensitive settlement figures in Adobe Acrobat leaves raw text intact; opposing counsel simply copy-pastes the hidden figures directly out of the court PDF.

Manual Exhibit & Bates Chaos

Manually combining mixed case evidence (police reports, phone photos, balance sheets) causes indexing delays, misaligned page counts, and rejected petition filings before High Court benches.

The RQL Sovereign Solution: 100% Air-Gapped Workstation Execution

Every legal suite from Rehan Quant Lab is hand-forged in 100% pure native Rust for Windows. Win32 PE32+ executables run with zero network telemetry directly inside local computer RAM. Your litigation briefs, trade secrets, and witness statements never touch external cloud servers. Zero Electron bloat, zero Python interpreters, and air-gapped cryptographic hardware licensing (`license.rql`). Formally analyzed and certified clean by Microsoft Defender Security Intelligence.
